also employs many of our graduates in jobs as varied as direct lawn maintenance, research, and sales. The major offers many opportunities for employment in the golf course industry, while others choose to specialize in sports turf management. The Turfgrass Science and Management major have the option of selecting a business management or a science focus. Many graduates find employment in plant conservatories and arboreta as well as manage businesses, including direct-market farms, greenhouse operations, landscaping firms and nurseries, or they continue to graduate school for advanced degrees.

Plant and Soil Sciences

Through theoretical and practical training, the Plant and Soil Sciences major prepares students to tackle real-world problems by integrating and applying knowledge they learn from different disciplines. This major includes rigorous training in biology and laboratory methods. Students focus their study in one of two general areas: plant science or soil science. They may also choose to focus their advanced course work in horticultural science, plant pathology, plant science and biotechnology, soil science or a related discipline. Many successful graduates work in research or applied aspects of the biotech industries, agricultural and horticultural businesses, environmental consulting areas, and pest management. Others go on for advanced graduate training for careers in academia, business, or the public sector.

Sustainable Food and Farming

The Sustainable Food and Farming major allows students who are interested in the practical, social, political and scientific issues of sustainable agriculture and food systems to seek a broad exposure to this discipline in the liberal arts tradition. Students can tailor their individual programs to prepare for careers in sustainable farming, policy, advocacy, community outreach and education in topics related to crop production, food access, and hunger issues, as well as many others. Graduates will be qualified to compete successfully for a wide array of emerging careers in the growing field of sustainable food systems.

Horticultural Science

Concepts and practices vital to the preservation of natural resources in managed plant systems are stressed. This major provides students with the tools and knowledge to work in the horticultural field. Students receive scientific training in the production of herbaceous ornamentals, fruits, and vegetables. In addition, students have the option of taking business courses to complement their horticultural training or to further enhance their scientific training through more courses in basic science. The University-operated greenhouses, vegetable field, and orchard are used as laboratory spaces to provide hands-on experience related to knowledge acquired in the classroom. Successful graduates find employment in plant conservatories and arboreta as well as manage businesses, including direct-market farms, greenhouse operations, landscaping firms and nurseries, or they continue to graduate school for advanced degrees.

Turfgrass Science and Management

The Turfgrass Science and Management major is an applied science program that focuses on the production and maintenance of grassed areas, including home lawns, parks, golf courses and other athletic surfaces. This concentration integrates scientific theory with practical experience and covers such topics as grass and seed identification, turfgrass culture and physiology, pest control, and equipment maintenance. Students in this major have the option of selecting a business management or a science focus. Many graduates find employment in the golf course industry, while others choose to specialize in sports turf management. The lawn care industry also employs many of our graduates in jobs as varied as direct lawn maintenance, research, and sales.

<tr>
<td>The undergraduate curriculum in the Stockbridge School of Agriculture has been designed with the goal of allowing students to tailor their course work to best reflect individual academic interests and career objectives. The major encompasses a broad range of related disciplines dealing with applied biology and ecology. Specific majors include: Horticultural Science, Plant and Soil Sciences, Sustainable Food and Farming, and Turfgrass Science and Management.</td>
</tr>
</tbody>
</table>

Students begin their studies with introductory classes in the major and with general education courses required of all University students. These initial courses, which include biology, chemistry, ecology and mathematics, form the foundation for more advanced study in the major. The exact sequence of courses is determined by the student's selection of an area of study. Independent study and internships are available under each major providing students with the opportunity to integrate laboratory and field work into their curriculum.

All four majors share a common core of discipline areas:

- **Biological Science**
  - two semesters of course work with labs in introductory biology, botany and/or soil science
- **Chemistry**
  - one semester minimum of introductory chemistry with lab
- **Ecosystems Studies**
  - a course in the fundamentals of ecosystem ecology
- **Math, Statistics and Reasoning**
  - two semesters in math, statistics and/or analytical reasoning
- **Writing**
  - two semesters of writing: College Writing taken during the freshman year, and Junior Year Writing

Independent Study and Internships
Students are encouraged to enhance their major with an independent study research project or an internship experience. These opportunities provide students with experience and training that will be useful in career planning as well as in decision-making regarding fields of possible graduate study. Students must have attained at least sophomore status and be in good academic standing. The University allows up to 18 credits of internship to be applied towards the 120 credits required for graduation.

**Independent Study** - students wishing to complete a research project or independent learning project must select a faculty member within the major who will approve the project and provide guidance. An Independent Study form must be completed, which specifies the number of credits to be earned, a statement of objectives, planned activities, and criteria to be used for evaluation and grading. This form must be filed with the Director's Office before the project is initiated.

**Internships** - an internship is a summer or semester-long work experience that allows students to "apprentice" with professionals in their field. Internships are intended to be learning experiences, and do not necessarily provide significant monetary compensation. Instead, academic credits are earned. Students can earn 12 credits for a full-time, semester long internship experience and 3 to 9 credits for a summer program. Prior to undertaking an internship, the student and his/her faculty sponsor must complete an Academic Contract (Independent Study/Practicum form), including planned activities, a statement of objectives, as well as criteria for evaluation and grading.

## General Information

### Curriculum Requirements

The undergraduate curriculum in the Stockbridge School of Agriculture has been designed with the goal of allowing students to tailor their course work to best reflect individual academic interests and career objectives. The major encompasses a broad range of related disciplines dealing with applied biology and ecology. Specific majors include: Horticultural Science, Plant and Soil Sciences, Sustainable Food and Farming, and Turfgrass Science and Management.

Students begin their studies with introductory classes in the major and with general education courses required of all University students. These initial courses, which include biology, chemistry, ecology and mathematics, form the foundation for more advanced study in the major. The exact sequence of courses is determined by the student's selection of an area of study. Independent study and internships are available under each major providing students with the opportunity to integrate laboratory and field work into their curriculum.

All four majors share a common core of discipline areas:

- **Biological Science**
  - two semesters of course work with labs in introductory biology, botany and/or soil science
- **Chemistry**
  - one semester minimum of introductory chemistry with lab
- **Ecosystems Studies**
  - a course in the fundamentals of ecosystem ecology
- **Math, Statistics and Reasoning**
  - two semesters in math, statistics and/or analytical reasoning
- **Writing**
  - two semesters of writing: College Writing taken during the freshman year, and Junior Year Writing

### Independent Study and Internships

Students are encouraged to enhance their major with an independent study research project or an internship experience. These opportunities provide students with experience and training that will be useful in career planning as well as in decision-making regarding fields of possible graduate study. Students must have attained at least sophomore status and be in good academic standing. The University allows up to 18 credits of internship to be applied towards the 120 credits required for graduation.

**Independent Study** - students wishing to complete a research project or independent learning project must select a faculty member within the major who will approve the project and provide guidance. An Independent Study form must be completed, which specifies the number of credits to be earned, a statement of objectives, planned activities, and criteria to be used for evaluation and grading. This form must be filed with the Director's Office before the project is initiated.

**Internships** - an internship is a summer or semester-long work experience that allows students to "apprentice" with professionals in their field. Internships are intended to be learning experiences, and do not necessarily provide significant monetary compensation. Instead, academic credits are earned. Students can earn 12 credits for a full-time, semester long internship experience and 3 to 9 credits for a summer program. Prior to undertaking an internship, the student and his/her faculty sponsor must complete an Academic Contract (Independent Study/Practicum form), including planned activities, a statement of objectives, as well as criteria for evaluation and grading.
Major Requirements
Students will complete a minimum of 30 course credits taken within the Stockbridge School of Agriculture. Specific course requirements vary by major.

Research Papers & Projects Assistance
Two librarians are available to Stockbridge School of Agriculture students to provide assistance with finding reliable information for research papers and other projects. Students may contact them for an individual consultation by phone, email, Skype, or in person. Please feel free to contact:
Paulina Borrego, Lederle Grad Research Center; 413-545-7891; pborrego@library.umass.edu
Madeleine Charney, Du Bois Library; 413-577-0784; mcharney@library.umass.edu

UNIVERSITY REQUIREMENTS

Credits
A minimum of 120 credits must be earned, at least 45 of which must be earned in residence. Residence credits are defined as credits earned for work done while registered on the UMass Amherst campus or while enrolled in one of the University's formal exchange programs. In addition, students generally must complete their final year in residence, residence in this sense meaning continuous enrollment and regular attendance in classes conducted on the Amherst campus.

Grade Point Average (GPA)
A cumulative average of at least C (2.0 GPA) overall, and a minimum C (2.0 cumulative GPA) for courses in the major.

General Education (GEN ED) Requirements
Consult your Academic Requirements Report (ARR) and/or advisor for clarification

Analytic Reasoning 1 course
1. Course designated R2

Basic Math Skills 1 course
1. Basic Math Skills (R1)
OR
2. Student may be exempt if sufficient score is achieved on Mathematics Placement Exam or the Basic Math Skills Exemption Exam

Biological and Physical World 3 courses
1. Biological Science (BS) 1 course
2. Physical Science (PS) 1 course
3. Biological Science (BS) or Physical Science (PS) 1 course

Integrative Experience 1 course
1. Integrative Experience (IE)

Interdisciplinary Option
Substitution of up to three Interdisciplinary (I) courses for some General Education requirements. No substitutions allowed for College Writing (CW), Basic Math Skills (R1), or Analytic Reasoning (R2).

Students may substitute up to three Interdisciplinary (I) courses in the other areas subject to the restriction that all students must take at least one course in each of the following areas: Literature (AL), Historical Studies (HS), Social and Behavioral Sciences (SB), Biological Sciences (BS), and Physical Sciences (PS). An Interdisciplinary (I) course will fulfill a Diversity requirement only if it is designated ID.

Social World 6 courses
Courses in the curriculum areas of Arts, Literature, Historical Studies, and Social and Behavioral Sciences. Also required are courses devoted to the study of diversity in human cultures and societies.

1. Literature (AL) 1 course
2. Arts (AT) or Literature (AL) 1 course
3. Historical Studies (HS) 1 course
4. Social and Behavioral Sciences (SB) 2 courses
5. Social World (AL, AT, HS, or SB) or Interdisciplinary (I) 1 course

The diversity requirement is met by taking two courses designated as having a Social and Cultural Diversity (D) component. These may be courses which also fulfill other General Education requirements, and bear both letter designations (ALD, ATD, HSD, SBD, or ID), or one or both Diversity courses may have only a Diversity designation (D).

Writing 2 courses
1. College Writing (CW) during freshman year
2. Junior Year Writing within the major

Notes:

a. Your major department:
   - only one course counts towards Gen Ed requirements
   - one additional course can fulfill a Diversity requirement
b. Gen Ed courses cannot be taken on a Pass/Fail basis
**Major Requirements**

Students will complete a minimum of 30 course credits taken within the Stockbridge School of Agriculture. Specific course requirements vary by major.

Focus
SELECT BUSINESS OR SCIENCE FOCUS:

1. Business Focus
SELECT FOUR (4) COURSES IN BUSINESS
These courses should be distributed across four of the five categories below (a-e):

a. fall/spr ACCOUNTG 221 Principles of Financial Accounting 3
b. fall/spr ECON 103 Introduction to Microeconomics (SB) 4
OR ECON 104 Introduction to Macroeconomics (SB) 4
OR RES-ECON 102 Introductory Resource Economics (SB) 4
OR HT-MGT 260 Human Resource Mgt/Hospitality Industry 3
OR MANAGMNT 314 Human Resource Management 3
c. fall/spr MANAGMNT 301 Principles of Management 3
d. fall/spr MARKETING 301 Fundamentals of Marketing 3

2. Science Focus
SELECT FOUR COURSES IN SCIENCE
CHOOSE ONE COURSE FROM EACH OF THE FOUR CATEGORIES (a-d) BELOW:

a. fall/spr BIOLOGY 151 Introductory Biology I (BS) 4
b. fall/spr BIOLOGY 285 Cellular & Molecular Biology 3
OR CHEM 250 Organic Chemistry 3
OR CHEM 261 Organic Chemistry 3
c. fall/spr CHEM 112 General Chemistry-Science (PS) 4
d. fall/spr MATH 127 Calculus for the Life and Social Sciences I (R2) 3
OR MATH 131 Calculus I (R2) 4

**Grand Total for Plant and Soil Sciences 68-73**
### Plant and Soil Sciences

#### Plant Biotechnology
- **Fall/Spr:** BIOLOGY 284 General Genetics Lab 2
- **Spr:** BIOLOGY 379H Genomics and Bioinformatics 3
- **Spr:** BIOLOGY 383H Gene and Genome Analysis 4
- **Spr:** BIOLOGY 510 Plant Physiology 4
- **Fall:** STOCKSCH 530 Plant Nutrition 4
- **Fall:** STOCKSCH 587 Phyto/Bioremediation 3

#### Plant Pathology
- **Fall/Spr:** MICROBIO 310 General Microbiology 3
- **Fall/Spr:** MICROBIO 312 Microbiology Laboratory 3
- **Fall:** STOCKSCH 505 General Plant Pathology 4
- **Spr:** STOCKSCH 510 Management and Ecology of Plant Diseases 3
- **Fall:** STOCKSCH 523 Plant Stress Physiology 3
- **Spr/Odd Yrs:** STOCKSCH 535 Diagnostic Plant Pathology 4
- **Spr:** STOCKSCH 545 Postharvest Biology 4
- **Fall/Even Yrs:** STOCKSCH 572 Nematology 4

#### Soil Science
- **Fall:** GEO-SCI 519 Aqueous Envirn Geochemistry 4
- **Fall/Even Yrs:** GEO-SCI 563 Geology Geocycle 4
- **Spr:** GEO-SCI 587 Hydrogeology 4
- **Spr:** NRC 506 Wetland Soils 2
- **Fall:** STOCKSCH 350 Sustainable Soil and Crop Management 3
- **Fall:** STOCKSCH 515 Microbiology of the Soil 3
- **Fall:** STOCKSCH 575 Environmental Soil Chemistry 4
- **Spr:** STOCKSCH 580 Soil Fertility 3
- **Spr:** STOCKSCH 585 Inorganic Contaminants/Soil,Water,& Sediments 3
- **Fall:** STOCKSCH 587 Phyto/Bioremediation 3
- **Spr:** STOCKSCH 590M Microbe-Mineral-Organic Matter/Soils 3

### Sustainable Food and Farming

**Professor Sarah Berquist, Advisor**

#### Core Requirements of the Major

##### Biological Science
- **Fall/Spr:** STOCKSCH 105 Soils (BS) 4
- **Fall:** STOCKSCH 108 Introductory Botany 4

##### Chemistry
- **Fall:** CHEM 100 General Chemistry (PS) 4
- **Fall/Spr:** CHEM 111 General Chemistry-Science (PS) 4
- **Fall:** CHEM 121H Honors General Chemistry-Science (PS) 4

##### Ecosystems Studies
- Select one of the following:
- **Fall/Spr:** BIOLOGY 287 Introductory Ecology 3
- **Fall:** STOCKSCH 186 Introduction to Permaculture 3

##### Food/Land Policy or Agricultural Education
- Select one of the following:
- **Fall:** STOCKSCH 297AL Agricultural Leadership & Community Educ 3
- **Fall/Even Yrs:** STOCKSCH 356 Food Justice and Policy 3

##### Integrative Experience
- **Spr:** NATSCI 494I Global Issues in Applied Biology 3
- **Fall:** STOCKSCH 379 Agricultural Systems Thinking 3

##### Junior Year Writing
- **Fall/Spr:** NATSCI 382 Professional Dev in Sustainable Food & Farming 3
- **Spr:** STOCKSCH 382 Professional Dev in Sustainable Food & Farming 3

### Math, Statistics and Reasoning

#### Basic Mathematics (R1)
- **Fall/Spr:** MATH 101 Precalculus Alg with Functions & Graphs 2
- **Fall/Spr:** MATH 102 Analytic Geometry & Trigonometry (R1) 2
- **Fall/Spr:** MATH 104 Algebra, Analytic Geometry, & Trig (R1) 3
- **Fall/Spr:** MATH 127 Calculus for the Life and Social Sciences I (R2) 3

#### Analytic Reasoning (R2)
- Advisor Approval Required 3

- Junior Year Writing 3
- Math, Statistics and Reasoning 6-8

Total Major Requirements 51-56

Required Courses 27-29

- Restricted Electives 24-27

Grand Total for Turfgrass Science and Management 78-86
STOCKBRIDGE SCHOOL COURSE DESCRIPTIONS

STOCKSCH 101
Insects & Related Forms
With lab. Introduction to insect recognition, development, damage, and control. Seven-week course; first 7 weeks of the semester.
2 credits/spring sem

STOCKSCH 104
Plant Nutrients
Functions of mineral nutrients in plants, effects of mineral deficiencies, and sources of these nutrients to prevent or alleviate deficiencies in crop production. Seven-week course; first 7 weeks of the semester.
Prerequisites: STOCKSCH 105; Stockbridge students only
2 credits/spring sem

STOCKSCH 105 (Gen Ed BS)
Soils
With lab. Interrelationship of soils and higher plants. Physical, chemical, and biological properties of soils. Practical approach to current problems through basic soil principles.
Prerequisite: some knowledge of chemistry
4 credits/both sem

STOCKSCH 107
Turfgrass Insects
Principles and practical methods of controlling turf insect pests.
Prerequisite: STOCKSCH 101 (may be taken concurrently)
2 credits/spring sem

STOCKSCH 108
Introductory Botany
With lab. This introductory botany course covers the unique features of plants, how they function, how they are categorized, and how they fit into the ecosystem. Topics include classification of plants, analysis of cell structure and various plant tissues and organs, and study of sexual and asexual reproduction as well as structure and function of plant systems. In addition, students will develop a basic understanding of the processes of photosynthesis and cellular respiration.
4 credits/fall sem

STOCKSCH 109
Insects of Ornamentals
With lab. The recognition, biology, and control of major insect and mite pests attacking shade trees and woody ornamentals in the northeastern U.S. Emphasis on techniques and knowledge useful to the professional in tree care.
Prerequisite: STOCKSCH 101
3 credits/fall sem

STOCKSCH 111
Introductory Plant Pathology
With discussion. Applied introduction to plant pathology in horticultural crops. Identification, description, and management of diseases in modern horticultural production. Chemical, biological, cultural, and genetic controls and their integration. Seven-week course; first 7 weeks of the semester.
Prerequisites: STOCKSCH 108 or 100-level biology course; Stockbridge students only
2 credits/spring sem

STOCKSCH 118
Introduction to Sustainable Food and Farming
Highly interactive and participatory introduction to the Sustainable Food and Farming major, focused on academic preparation, internships and careers. Especially for first year students and transfers into the major.
Prerequisite: Sustainable Food and Farming majors only
1 credit/fall sem

STOCKSCH 120
Organic Farming and Gardening (Gen Ed BS)
With discussion. Introduction to principles of soil fertility and crop management by organic procedures that are contrasted and evaluated against conventional chemical methods of farming.
4 credits/both sem

STOCKSCH 170
Pesticide Certification
Independent preparation for the state pesticide certification examination and licensure. The State Pesticide Exam Study Manual is used and available for purchase either online or at the UMass Extension Bookstore. Exams are given at various times throughout the state. Students must apply to take the exam; applications must be submitted by the deadline date (one week prior to the exam). Refer to www.mass.gov/age/pesticides or call 617-626-1841 for dates of Massachusetts exams.
Prerequisite: consent of instructor
1 credit/both sem
STOCKSCH 101  
**Insects & Related Forms**  
With lab. Introduction to insect recognition, development, damage, and control.  
Seven-week course; first 7 weeks of the semester.  
2 credits/spring sem

STOCKSCH 104  
**Plant Nutrients**  
Functions of mineral nutrients in plants, effects of mineral deficiencies, and sources of these nutrients to prevent or alleviate deficiencies in crop production.  
Seven-week course; first 7 weeks of the semester.  
Prerequisites: STOCKSCH 105; Stockbridge students only  
2 credits/spring sem

STOCKSCH 105 (Gen Ed BS)  
**Soils**  
With lab. Interrelationship of soils and higher plants. Physical, chemical, and biological properties of soils. Practical approach to current problems through basic soil principles.  
Prerequisite: some knowledge of chemistry  
4 credits/both sem

STOCKSCH 107  
**Turfgrass Insects**  
Principles and practical methods of controlling turf insect pests.  
Prerequisite: STOCKSCH 101 (may be taken concurrently)  
2 credits/spring sem

STOCKSCH 108  
**Introductory Botany**  
With lab. This introductory botany course covers the unique features of plants, how they function, how they are categorized, and how they fit into the ecosystem. Topics include classification of plants, analysis of cell structure and various plant tissues and organs, and study of sexual and asexual reproduction as well as structure and function of plant systems. In addition, students will develop a basic understanding of the processes of photosynthesis and cellular respiration.  
4 credits/fall sem

STOCKSCH 109  
**Insects of Ornamentals**  
With lab. The recognition, biology, and control of major insect and mite pests attacking shade trees and woody ornamentals in the northeastern U.S. Emphasis on techniques and knowledge useful to the professional in tree care.  
Prerequisite: STOCKSCH 101  
3 credits/fall sem

STOCKSCH 111  
**Introductory Plant Pathology**  
Seven-week course; first 7 weeks of the semester.  
Prerequisites: STOCKSCH 108 or 100-level biology course; Stockbridge students only  
2 credits/spring sem

STOCKSCH 118  
**Introduction to Sustainable Food and Farming**  
Highly interactive and participatory introduction to the Sustainable Food and Farming major, focused on academic preparation, internships and careers. Especially for first year students and transfers into the major.  
Prerequisite: Sustainable Food and Farming majors only  
1 credit/fall sem

STOCKSCH 120  
**Organic Farming and Gardening (Gen Ed BS)**  
With discussion. Introduction to principles of soil fertility and crop management by organic procedures that are contrasted and evaluated against conventional chemical methods of farming.  
4 credits/both sem

STOCKSCH 170  
**Pesticide Certification**  
Independent preparation for the state pesticide certification examination and licensure. The State Pesticide Exam Study Manual is used and available for purchase either online or at the UMass Extension Bookstore. Exams are given at various times throughout the state. Students must apply to take the exam; applications must be submitted by the deadline date (one week prior to the exam).  
Refer to www.mass.gov/agr/pesticides or call 617-626-1841 for dates of Massachusetts exams.  
Prerequisite: consent of instructor  
1 credit/both sem
STOCKSCH 171
Plagues, Food and People: Ecology of Food and Disease (Gen Ed BS)
The ecology of major diseases related to food, from ergotism and the Salem Witch Trials to the Irish Potato famine to celiac disease and diabetes. How people, microbes and farming change our health and the environment.
4 credits/spring sem

STOCKSCH 182
Principles of Pesticide Management
Topics include state and federal pesticide laws and regulations, pesticides and the environment, handling and storage of pesticides, classes and formulations of pesticides, safety and application equipment, understanding the pesticide label, toxicity, proper calculation and mixing of pesticides, and history of pesticide use. Includes preparation for the Massachusetts Pesticide Core Exam.
2 credits/spring sem

STOCKSCH 186
Introduction to Permaculture
Foundation in permaculture history, ethics, principles, design process, and practical applications, rooted in the observation of natural systems. Students are trained as critical thinkers, observers, and analysts of the world(s) around them and are provided with the tools necessary for designing and inspiring positive change.
3 credits/fall sem

STOCKSCH 190P
Personal Wellness for Farmers & Gardeners
Development of skills and understanding for maintaining a healthy lifestyle while being a successful farmer or gardener. Students will learn basic anatomy for safe and sustainable manual labor and practice applying safe body mechanics to typical farming labor tasks.
Prerequisite: Sustainable Food and Farming majors only
3 credits/spring sem

STOCKSCH 196
Independent Study
Independent work related to some area of the food crops and green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 197S
Soils Lab
For students who have completed STOCKSCH 106, and wish to complete the lab component of STOCKSCH 105 that is required for completing the major or minor in this program.
Prerequisite: STOCKSCH 106
1 credit/spring sem

STOCKSCH 198P
Permaculture Gardening at UMass
Students will learn about permaculture basics while maintaining UMass on-campus permaculture demonstration gardens.
1 credit/both sem

STOCKSCH 200
Plant Propagation
With lab. The basic principles and techniques for propagating plants by both sexual and asexual means, including seeds, cuttings, bulbs, and tissue culture. The hormonal and physiological factors affecting rooting, seed dormancy, grafting, budding, and layering.
Prerequisite: STOCKSCH 108 or 100-level biology course
3 credits/fall sem/odd years

STOCKSCH 230
Introductory Turfgrass Management
With lab. Basic principles of selecting and managing turfgrass for home lawns, parks, golf courses, and other turf areas. Topics include: climatic adaptation, grass identification, establishment practices, pest control, fertility, environmental stresses, etc.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 (may be taken concurrently)
4 credits/fall sem

STOCKSCH 234
Irrigation & Drainage
Principles of hydraulics and system design for turf and landscapes with an emphasis on golf courses. Irrigation systems, equipment performance, installation practices, operation procedures and troubleshooting. Drainage of sports turf also included.
2 credits/spring sem

STOCKSCH 235
Pruning Fruit Crops
With lab. Theory and practice of pruning deciduous fruit plants/trees. Emphasis on practical, hands-on experience.
2 credits/spring sem

STOCKSCH 240
Applied Calculations in Turf Management
Calculations involving area and volume measurements, fertilizer and pesticide requirements, cost analysis, seed calculations, irrigation calculations, and calculations relating to spreader and sprayer calibrations.
Prerequisite: STOCKSCH 230
2 credits/spring sem
STOCKSCH 171
Plagues, Food and People: Ecology of Food and Disease (Gen Ed BS)
The ecology of major diseases related to food, from ergotism and the Salem Witch Trials to the Irish Potato famine to celiac disease and diabetes. How people, microbes and farming change our health and the environment.
4 credits/spring sem

STOCKSCH 182
Principles of Pesticide Management
Topics include state and federal pesticide laws and regulations, pesticides and the environment, handling and storage of pesticides, classes and formulations of pesticides, safety and application equipment, understanding the pesticide label, toxicity, proper calculation and mixing of pesticides, and history of pesticide use. Includes preparation for the Massachusetts Pesticide Core Exam.
2 credits/spring sem

STOCKSCH 186
Introduction to Permaculture
Foundation in permaculture history, ethics, principles, design process, and practical applications, rooted in the observation of natural systems. Students are trained as critical thinkers, observers, and analysts of the world(s) around them and are provided with the tools necessary for designing and inspiring positive change.
3 credits/fall sem

STOCKSCH 190P
Personal Wellness for Farmers & Gardeners
Development of skills and understanding for maintaining a healthy lifestyle while being a successful farmer or gardener. Students will learn basic anatomy for safe and sustainable manual labor and practice applying safe body mechanics to typical farming labor tasks.
Prerequisite: Sustainable Food and Farming majors only
3 credits/spring sem

STOCKSCH 196
Independent Study
Independent work related to some area of the food crops and green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 197S
Soils Lab
For students who have completed STOCKSCH 106, and wish to complete the lab component of STOCKSCH 105 that is required for completing the major or minor in this program.
Prerequisite: STOCKSCH 106
1 credit/spring sem

STOCKSCH 198P
Permaculture Gardening at UMass
Students will learn about permaculture basics while maintaining UMass on-campus permaculture demonstration gardens.
1 credit/both sem

STOCKSCH 200
Plant Propagation
With lab. The basic principles and techniques for propagating plants by both sexual and asexual means, including seeds, cuttings, bulbs, and tissue culture. The hormonal and physiological factors affecting rooting, seed dormancy, grafting, budding, and layering.
Prerequisite: STOCKSCH 108 or 100-level biology course
3 credits/fall sem/odd years

STOCKSCH 230
Introductory Turfgrass Management
With lab. Basic principles of selecting and managing turfgrass for home lawns, parks, golf courses, and other turf areas. Topics include: climatic adaptation, grass identification, establishment practices, pest control, fertility, environmental stresses, etc.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 (may be taken concurrently)
4 credits/fall sem

STOCKSCH 234
Irrigation & Drainage
Principles of hydraulics and system design for turf and landscapes with an emphasis on golf courses. Irrigation systems, equipment performance, installation practices, operation procedures and troubleshooting. Drainage of sports turf also included.
2 credits/spring sem

STOCKSCH 235
Pruning Fruit Crops
With lab. Theory and practice of pruning deciduous fruit plants/trees. Emphasis on practical, hands-on experience.
2 credits/spring sem

STOCKSCH 240
Applied Calculations in Turf Management
Calculations involving area and volume measurements, fertilizer and pesticide requirements, cost analysis, seed calculations, irrigation calculations, and calculations relating to spreader and sprayer calibrations.
Prerequisite: STOCKSCH 230
2 credits/spring sem
STOCKSCH 255
Herbaceous Plants
Study and identification of herbaceous plants; their uses as ornamental plants for home, park, and
business.
Prerequisite: Stockbridge students only
3 credits/spring sem

STOCKSCH 258
Urban Agriculture
Explores innovative production methods and critical social, economic, and environmental dimensions
of modern day urban agriculture.
3 credits/spring sem

STOCKSCH 258
Urban Agriculture
Explores innovative production methods and critical social, economic, and environmental dimensions
of modern day urban agriculture.
3 credits/spring sem

STOCKSCH 265
Sustainable Agriculture
Exploration of ethical, practical and scientific aspects of agricultural sustainability, including economic,
social and environmental impacts of food and farming. Uses systems thinking tools to compare
industrial and ecological agriculture.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem

STOCKSCH 268
Small Farm Husbandry: Cows, Sheep & Goats for Meat Production
With discussion. A farmer's perspective on the sustainable management of cows, sheep and goats on
a small farm. Focus on the planning and management of cows, sheep and goats for meat production.
All aspects from breeding to marketing will be addressed.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/spring sem

STOCKSCH 269
Small Farm Husbandry: Pigs & Poultry
With discussion. A farmer's perspective on the management, production and marketing of poultry
and pigs on a small farm. This course will address the advantages of having pigs and poultry and
will review basic care, processing options, regulations and marketing.
Prerequisite: Sustainable Food and Farming majors only
3 credits/fall sem

STOCKSCH 275
Turfgrass Physiology & Ecology
First half of the semester: an introduction to basic concepts in agricultural chemistry as related to the
growth and culture of turf grasses. Second half of the semester: the overall growth and development of
grasses, including such areas as soil fertility and mineral nutrition.
Prerequisite: STOCKSCH 230
3 credits/spring sem

STOCKSCH 281
Topics in Herbalism I
Introduction to the broad field of herbalism through the eyes of a clinical and community herbalist.
Topics include historical overview; comparison of major health models of allopathy and holism,
introduction to diverse herbal-based health models (Western, Asian, Indigenous), in-depth information
on medicinal plants, plant ID, gathering/growing/preparation skills, diverse tools of an herbalist, food as
medicine, ethics, politics, and legalities of herbalism.
2 credits/fall sem

STOCKSCH 286
Permaculture Design and Practice
Deepened and applied practice in permaculture design process and techniques. Development of a
permaculture design and community engagement process.
Prerequisites: STOCKSCH 186 (formerly STOCKSCH 197G); Sustainable Food and Farming majors
only or consent of instructor
3 credits/spring sem

STOCKSCH 290W
Organic Weed Control
Focus on organic weed control by exploring various systems and approaches to weed management
to reduce losses to crop yield and quality.
3 credits/spring sem

STOCKSCH 296
Independent Study
Sophomore-level educational project with a faculty member related to some area of the food crops
or green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 296T
Stockbridge School Teaching Experience
Students gain experience teaching introductory level (100-200) courses. Students will be expected to
demonstrate specific competencies related to labs and assisting students; lead review sessions; gain
experience in all aspects of teaching a Stockbridge School class.
Prerequisites: successful completion of the course and related prerequisites in which the student plans
to TA; consent of instructor
1-2 credits/both sem

STOCKSCH 297AL
Agricultural Leadership & Community Education
Focus on learning to work with community groups and schools as a community educator.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem
STOCKSCH 255
Herbaceous Plants
Study and identification of herbaceous plants; their uses as ornamental plants for home, park, and business.
Prerequisite: Stockbridge students only
3 credits/spring sem

STOCKSCH 258
Urban Agriculture
Explores innovative production methods and critical social, economic, and environmental dimensions of modern day urban agriculture.
3 credits/spring sem

STOCKSCH 257
Turfgrass Physiology & Ecology
First half of the semester: an introduction to basic concepts in agricultural chemistry as related to the growth and culture of turf grasses. Second half of the semester: the overall growth and development of grasses, including such areas as soil fertility and mineral nutrition.
Prerequisite: STOCKSCH 230
3 credits/spring sem

STOCKSCH 256
Sustainable Agriculture
Exploration of ethical, practical and scientific aspects of agricultural sustainability, including economic, social and environmental impacts of food and farming. Uses systems thinking tools to compare industrial and ecological agriculture.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem

STOCKSCH 258
Urban Agriculture
Explores innovative production methods and critical social, economic, and environmental dimensions of modern day urban agriculture.
3 credits/spring sem

STOCKSCH 259
Small Farm Husbandry: Cows, Sheep & Goats for Meat Production
With discussion. A farmer’s perspective on the sustainable management of cows, sheep and goats on a small farm. Focus on the planning and management of cows, sheep and goats for meat production. All aspects from breeding to marketing will be addressed.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/spring sem

STOCKSCH 260
Small Farm Husbandry: Pigs & Poultry
With discussion. A farmer’s perspective on the management, production and marketing of poultry and pigs on a small farm. This course will address the advantages of having pigs and poultry and will review basic care, processing options, regulations and marketing.
Prerequisite: Sustainable Food and Farming majors only
3 credits/fall sem

STOCKSCH 261
Topics in Herbalism I
Introduction to the broad field of herbalism through the eyes of a clinical and community herbalist. Topics include historical overview; comparison of major health models of allopathy and holism, introduction to diverse herbal-based health models (Western, Asian, Indigenous), in-depth information on medicinal plants, plant ID, gathering/growing/preparation skills, diverse tools of an herbalist, food as medicine; ethics, politics, and legalities of herbalism.
2 credits/fall sem

STOCKSCH 262
Permaculture Design and Practice
Deepened and applied practice in permaculture design process and techniques. Development of a permaculture design and community engagement process.
Prerequisites: STOCKSCH 186 (formerly STOCKSCH 197G); Sustainable Food and Farming majors only or consent of instructor
3 credits/spring sem

STOCKSCH 263
Organic Weed Control
Focus on organic weed control by exploring various systems and approaches to weed management to reduce losses to crop yield and quality.
3 credits/spring sem

STOCKSCH 264
Independent Study
Sophomore-level educational project with a faculty member related to some area of the food crops or green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 265
Agricultural Leadership & Community Education
Focus on learning to work with community groups and schools as a community educator.
Prerequisite: Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem
STOCKSCH 297B
Forest Gardens: Perennial Agriculture for Ecological Regeneration
Focus on deepened understanding of forest gardens, with a focus on northeast temperate climates. Exploration of the resilience and benefits of forest systems and how they could be tweaked for the creation of forest gardens.
3 credits/fall sem

STOCKSCH 298
Practicum
Pre-professional work experience related to some area of the food crops and green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 298A
Agricultural Practicum
Description unavailable.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 298FS
USDA Farm Services Agency Practicum
Participants work under the direction of USDA Farm Service Agency personnel, provide assistance to the farm loan process, participate in government assistance programs, and work with USDA FSA outreach.
Prerequisite: consent of instructor
1-5 credits/both sem

STOCKSCH 298G
Gardenshare Practicum
Student-led practicum experience utilizing a plot of land on campus to grow edible and ornamental crops. Although offered every semester, specific garden activities depend on the season of the year. Students may enroll more than once for credit.
Prerequisite: consent of instructor
1 credit/fall sem

STOCKSCH 298P
Permaculture Practicum
Hands-on, in-depth experience of how to manage and implement an installation of a permaculture design.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 300
Deciduous Orchards Science
With lab. Principles and practices involved in the establishment and management of deciduous orchards.
Prerequisite: STOCKSCH 108 (may be taken concurrently)
3 credits/fall sem/odd years

STOCKSCH 305
Small Fruit Production
With lab. Principles and practices governing the establishment and management of small fruit plantings.
Prerequisite: STOCKSCH 108 (may be taken concurrently)
3 credits/fall sem/even years

STOCKSCH 310
Principles of Weed Management
With lab. History of weed control; importance of weeds and their relationship to people and the environment; ecology of weeds, competition, persistence and survival mechanisms; reproduction, seed germination, and dormancy; methods of weed control, cultural, biological, chemical, and integrated pest management strategies; classification of herbicides and their selectivity; soil factors affecting herbicide performance, persistence and degradation; application equipment and calibration of sprayers; weed management systems for various crops and non-crop areas.
Prerequisite: STOCKSCH 108 or 100-level biology course
3 credits/fall sem

STOCKSCH 315
Greenhouse Management
With lab. Introduction to the greenhouse environment and the technology used in production of greenhouse crops. Greenhouse experiments in crop production; exercises on greenhouse structures, heating and cooling, growing media, crop nutrition, photoperiod control and lighting, and crop scheduling; field trip to local greenhouses.
Prerequisites: STOCKSCH 108 (may be taken concurrently) or 100-level biology course; Stockbridge students only or consent of instructor
4 credits/fall sem/even years

STOCKSCH 320
Organic Vegetable Production
Focus on organic insect, disease, and weed control, greenhouse production and construction, irrigation practices, planting and fertility, harvesting and marketing techniques, as well as how to manage money, people and natural resources.
Prerequisite: Sustainable Food and Farming majors only
3 credits/fall sem
STOCKSCH 297B
Forest Gardens: Perennial Agriculture for Ecological Regeneration
Focus on deepened understanding of forest gardens, with a focus on northeast temperate climates.
Exploration of the resilience and benefits of forest systems and how they could be tweaked for the creation of forest gardens.
3 credits/fall sem

STOCKSCH 298
Practicum
Pre-professional work experience related to some area of the food crops and green industries.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 298A
Agricultural Practicum
Description unavailable.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 298FS
USDA Farm Services Agency Practicum
Participants work under the direction of USDA Farm Service Agency personnel, provide assistance to the farm loan process, participate in government assistance programs, and work with USDA FSA outreach.
Prerequisite: consent of instructor
1-5 credits/both sem

STOCKSCH 298G
Gardenshare Practicum
Student-led practicum experience utilizing a plot of land on campus to grow edible and ornamental crops. Although offered every semester, specific garden activities depend on the season of the year. Students may enroll more than once for credit.
Prerequisite: consent of instructor
1 credit/fall sem

STOCKSCH 298P
Permaculture Practicum
Hands-on, in-depth experience of how to manage and implement a installation of a permaculture design.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 300
Deciduous Orchards Science
With lab. Principles and practices involved in the establishment and management of deciduous orchards.
Prerequisite: STOCKSCH 108 (may be taken concurrently)
3 credits/fall sem/odd years

STOCKSCH 305
Small Fruit Production
With lab. Principles and practices governing the establishment and management of small fruit plantings.
Prerequisite: STOCKSCH 108 (may be taken concurrently)
3 credits/fall sem/even years

STOCKSCH 310
Principles of Weed Management
With lab. History of weed control; importance of weeds and their relationship to people and the environment; ecology of weeds, competition, persistence and survival mechanisms; reproduction, seed germination, and dormancy; methods of weed control, cultural, biological, chemical, and integrated pest management strategies; classification of herbicides and their selectivity; soil factors affecting herbicide performance, persistence and degradation; application equipment and calibration of sprayers; weed management systems for various crops and non-crop areas.
Prerequisite: STOCKSCH 108 or 100-level biology course
3 credits/fall sem

STOCKSCH 315
Greenhouse Management
With lab. Introduction to the greenhouse environment and the technology used in production of greenhouse crops. Greenhouse experiments in crop production; exercises on greenhouse structures, heating and cooling, growing media, crop nutrition, photoperiod control and lighting, and crop scheduling; field trip to local greenhouses.
Prerequisites: STOCKSCH 108 (may be taken concurrently) or 100-level biology course; Stockbridge students only or consent of instructor
4 credits/fall sem/even years

STOCKSCH 320
Organic Vegetable Production
Focus on organic insect, disease, and weed control, greenhouse production and construction, irrigation practices, planting and fertility, harvesting and marketing techniques, as well as how to manage money, people and natural resources.
Prerequisite: Sustainable Food and Farming majors only
3 credits/fall sem
STOCKSCH 326
Insect Biology
With optional lab and field trips. How insects solve their problems of maintenance, survival, reproduction, etc., and how entomologists apply this knowledge in managing them. Topics include insect evolution, plant and insect interactions, biodiversity and conservation of insects, behavior, and insect pest management. Emphasis on various insect models (e.g., Drosophila) as they relate to major research in biology.
3 credits/fall sem

STOCKSCH 335
Principles and Practices of Greenhouse Cultivation
With lab. Greenhouse culture of spring greenhouse crops.
Prerequisites: STOCKSCH 108; Horticultural Science and Plant and Soil Sciences majors only
4 credits/spring sem

STOCKSCH 340
Advanced Turfgrass Management
Management of environmental stress in turfgrass. Special practices in managing high-quality turfgrass areas such as golf courses, athletic fields, and ornamental areas.
Prerequisite: STOCKSCH 275
3 credits/spring sem

STOCKSCH 350
Sustainable Soil and Crop Management
With lab. Maintenance and enhancement of long-term productivity and sustainability of soil in food and feed production. Students will gain an integrated knowledge of soil and crop influences on cropping systems.
Prerequisite: STOCKSCH 105 (may be taken concurrently) or consent of instructor
3 credits/fall sem

STOCKSCH 355
Community Food Systems
With lab. Examines the movement of food from seed to table. Participants explore local and global food systems, and specific food related issues that impact health of communities. Focus on the opportunities and challenges required in making community food projects that create real lasting systems change.
3 credits/fall sem/odd years

STOCKSCH 356
Food Justice and Policy
With lab. Focus on the role of policy in determining what we eat, who experiences barriers to access safe, healthy, local foods, and how we create equity and sustainability in our local food system. Basic components of our food system will be discussed: production, distribution, and consumption. Systemic structures of race, class, citizenship and ability as they relate to access to healthy local food will be examined.
Prerequisites: STOCKSCH 265; Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem/odd years

STOCKSCH 360
Landscape Plant Production
With lab. Cultural practices of field and container production; how these practices and environmental factors influence nursery crop growth and development. Topics include: site selection, planting and spacing, mineral nutrition, harvesting, irrigation practices, pest management, and overwintering. Basic economic management of nursery crops production and marketing reviewed.
Prerequisites: STOCKSCH 105; SUSTCOMM 335 highly recommended
4 credits/fall sem/odd years

STOCKSCH 370
Tropical Agriculture
Tropical regions of the world, their environment and classification; influence of climate, population, and socio-economic conditions on agriculture; major crops and cropping systems of sub-humid tropics; introduction to dry land agriculture; importance of rainfall and irrigation on productivity; green revolution; desertification; present and future research needs of region, and state of agricultural technology.
3 credits/spring sem

STOCKSCH 376
Student Farm Management I
How to formulate a complete production plan for a 20 acre organic vegetable farm through the comprehension of introduced topics and activity. Topics include small farm business development, production planning for established markets, compliance with farm certifications for organic production and food safety regulations, soil health and fertility, and methods for plant production and crop maintenance.
Prerequisites: STOCKSCH 105 and STOCKSCH 398E (taken concurrently)
3 credits/spring sem
STOCKSCH 326  
Insect Biology  
With optional lab and field trips. How insects solve their problems of maintenance, survival, reproduction, etc., and how entomologists apply this knowledge in managing them. Topics include insect evolution, plant and insect interactions, biodiversity and conservation of insects, behavior, and insect pest management. Emphasis on various insect models (e.g., Drosophila) as they relate to major research in biology.  
3 credits/fall sem  

STOCKSCH 335  
Principles and Practices of Greenhouse Cultivation  
With lab. Greenhouse culture of spring greenhouse crops.  
Prerequisites: STOCKSCH 108; Horticultural Science and Plant and Soil Sciences majors only  
4 credits/spring sem  

STOCKSCH 340  
Advanced Turfgrass Management  
Management of environmental stress in turfgrass. Special practices in managing high-quality turfgrass areas such as golf courses, athletic fields, and ornamental areas.  
Prerequisite: STOCKSCH 275  
3 credits/spring sem  

STOCKSCH 350  
Sustainable Soil and Crop Management  
With lab. Maintenance and enhancement of long-term productivity and sustainability of soil in food and feed production. Students will gain an integrated knowledge of soil and crop influences on cropping systems.  
Prerequisite: STOCKSCH 105 (may be taken concurrently) or consent of instructor  
3 credits/spring sem  

STOCKSCH 355  
Community Food Systems  
With lab. Examines the movement of food from seed to table. Participants explore local and global food systems, and specific food related issues that impact health of communities. Focus on the opportunities and challenges required in making community food projects that create real lasting systems change.  
3 credits/fall sem/odd years  

STOCKSCH 356  
Food Justice and Policy  
With lab. Focus on the role of policy in determining what we eat, who experiences barriers to access safe, healthy, local foods, and how we create equity and sustainability in our local food system. Basic components of our food system will be discussed: production, distribution, and consumption. Systemic structures of race, class, citizenship and ability as they relate to access to healthy local food will be examined.  
Prerequisites: STOCKSCH 265; Sustainable Food and Farming majors only or consent of instructor  
3 credits/fall sem/odd years  

STOCKSCH 360  
Landscape Plant Production  
How to formulate a complete production plan for a 20 acre organic vegetable farm through the comprehension of introduced topics and activity. Topics include small farm business development, production planning for established markets, compliance with farm certifications for organic production and food safety regulations, soil health and fertility, and methods for plant production and crop maintenance.  
Prerequisites: STOCKSCH 105 and STOCKSCH 398E (taken concurrently)  
3 credits/spring sem  

STOCKSCH 370  
Tropical Agriculture  
Tropical regions of the world, their environment and classification; influence of climate, population, and socio-economic conditions on agriculture; major crops and cropping systems of sub-humid tropics; introduction to dry land agriculture; importance of rainfall and irrigation on productivity; green revolution; desertification; present and future research needs of region, and state of agricultural technology.  
3 credits/spring sem  

STOCKSCH 376  
Student Farm Management I  
How to formulate a complete production plan for a 20 acre organic vegetable farm through the comprehension of introduced topics and activity. Topics include small farm business development, production planning for established markets, compliance with farm certifications for organic production and food safety regulations, soil health and fertility, and methods for plant production and crop maintenance.  
Prerequisites: STOCKSCH 105 and STOCKSCH 398E (taken concurrently)  
3 credits/spring sem
STOCKSCH 379
Agricultural Systems Thinking
With discussion. Systems thinking is a way of understanding complex real-world situations such as those often encountered in sustainable food and farming careers. Students will be introduced to systems tools for unraveling complexity and integrating their learning from previous courses and experience.
Prerequisites: STOCKSCH 265; junior and senior Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem

STOCKSCH 382
Professional Development in Sustainable Food and Farming
Satisfies the Junior Year Writing requirement for Sustainable Food and Farming majors. Practice and improve writing while clarifying career goals and improving professional communication skills.
Prerequisites: ENGLWRIT 112; Sustainable Food and Farming majors only
3 credits/spring sem

STOCKSCH 384
Introduction to Plant Physiology
Introduction to fundamental concepts of physiological processes governing plant growth and development, from cell to whole plant responses. Blending of concepts from traditional plant physiology and recent research advances to help provide insight on plant growth and function under various environmental conditions.
Prerequisites: STOCKSCH 108 and CHEM 110 or CHEM 111
3 credits/spring sem

STOCKSCH 390A
Plant Biotechnology and Tissue Culture
With lab. Focus on the basic knowledge of plant tissue culture, recombinant DNA and gene expression technology required for transformation and assessment of genetically engineered crops. Students will be introduced to the application of biotechnology to address global food and nutritional security issues and controversies about the genetically modified crops (GMOs).
Prerequisites: BIOLOGY 151 or BIOLOGY 152, and CHEM 111 or CHEM 112
4 credits/spring sem

STOCKSCH 390G
Sustainable Grape Production
With lab. Exploration of grape origins, domestication, and fundamental principles of grape growing, both domestically and globally. Practices specific to the winter such, as pruning, will be included.
Seven-week course; first 7 weeks of the semester
3 credits/spring sem

STOCKSCH 390N
Ecosystem Processes
The flows of energy, carbon, and nutrients within ecosystems, tracing the key processes that define ecosystem function will be covered. Development of the connections between organisms, abiotic factors and ecosystem processes. The effects of environmental change on ecosystem processes will be highlighted.
Prerequisites: STOCKSCH 105, GEOLOGY 101, or ENVIRSCI 214; CHEM 111 recommended
3 credits/spring sem

STOCKSCH 391B
Turfgrass Science & Management
Practical review of key subjects in turfgrass science and management. Specifically designed to prepare students for National Collegiate Turf Bowl competitions in the areas of golf course and sports turf management. Students from across the country participate in annual competitions to gain recognition for their university’s turf programs and to network with industry professionals.
Prerequisites: STOCKSCH 105, STOCKSCH 107, STOCKSCH 240 and STOCKSCH 275
1 credit/fall sem

STOCKSCH 396
Independent Study
Upper-level project for students who have completed introductory courses in biology/botany, soils and/or entomology.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 397GB
Grapevine Biology
With lab. Viticultural practices, culture and grapevine biology related to fall production. Emphasis will be on the challenges and opportunities of the local cold climate and sustainable practices.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 or consent of instructor
3 credits/fall sem

STOCKSCH 397PT
Plant Trends in Landscape Horticulture
Description unavailable.
Prerequisite: STOCKSCH 108
3 credits/fall sem/even years

STOCKSCH 397R
Social Permaculture
How to apply permaculture ethics and principles to a variety of social systems. Use of methods and strategies that build capacity and resilience while leading to long term systemic change.
Prerequisite: Sustainable Food and Farming majors only
3 credits/spring sem
STOCKSCH 379
Agricultural Systems Thinking
With discussion. Systems thinking is a way of understanding complex real-world situations such as those often encountered in sustainable food and farming careers. Students will be introduced to systems tools for unraveling complexity and integrating their learning from previous courses and experience.
Prerequisites: STOCKSCH 265; junior and senior Sustainable Food and Farming majors only or consent of instructor
3 credits/fall sem

STOCKSCH 382
Professional Development in Sustainable Food and Farming
Satisfies the Junior Year Writing requirement for Sustainable Food and Farming majors. Practice and improve writing while clarifying career goals and improving professional communication skills.
Prerequisites: ENGLWRIT 112; Sustainable Food and Farming majors only
3 credits/spring sem

STOCKSCH 384
Introduction to Plant Physiology
Introduction to fundamental concepts of physiological processes governing plant growth and development, from cell to whole plant responses. Blending of concepts from traditional plant physiology and recent research advances to help provide insight on plant growth and function under various environmental conditions.
Prerequisites: STOCKSCH 108 and CHEM 110 or CHEM 111
3 credits/spring sem

STOCKSCH 390A
Plant Biotechnology and Tissue Culture
With lab. Focus on the basic knowledge of plant tissue culture, recombinant DNA and gene expression technology required for transformation and assessment of genetically engineered crops. Students will be introduced to the application of biotechnology to address global food and nutritional security issues and controversies about the genetically modified crops (GMOs).
Prerequisites: BIOLOGY 151 or BIOLOGY 152, and CHEM 111 or CHEM 112
4 credits/spring sem

STOCKSCH 390G
Sustainable Grape Production
With lab. Exploration of grape origins, domestication, and fundamental principles of grape growing, both domestically and globally. Practices specific to the winter such, as pruning, will be included.
Seven-week course; first 7 weeks of the semester
3 credits/spring sem

STOCKSCH 390N
Ecosystem Processes
The flows of energy, carbon, and nutrients within ecosystems, tracing the key processes that define ecosystem function will be covered. Development of the connections between organisms, abiotic factors and ecosystem processes. The effects of environmental change on ecosystem processes will be highlighted.
Prerequisites: STOCKSCH 105, GEOLOGY 101, or ENVIRSCI 214; CHEM 111 recommended
3 credits/spring sem

STOCKSCH 391B
Turfgrass Science & Management
Practical review of key subjects in turfgrass science and management. Specifically designed to prepare students for National Collegiate Turf Bowl competitions in the areas of golf course and sports turf management. Students from across the country participate in annual competitions to gain recognition for their university's turf programs and to network with industry professionals.
Prerequisites: STOCKSCH 105, STOCKSCH 107, STOCKSCH 240 and STOCKSCH 275
1 credit/fall sem

STOCKSCH 396
Independent Study
Upper-level project for students who have completed introductory courses in biology/botany, soils and/or entomology.
Prerequisite: consent of instructor
1-6 credits/both sem

STOCKSCH 397GB
Grapevine Biology
With lab. Viticultural practices, culture and grapevine biology related to fall production. Emphasis will be on the challenges and opportunities of the local cold climate and sustainable practices.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 or consent of instructor
3 credits/fall sem

STOCKSCH 397PT
Plant Trends in Landscape Horticulture
Description unavailable.
Prerequisite: STOCKSCH 108
3 credits/fall sem/even years

STOCKSCH 397R
Social Permaculture
How to apply permaculture ethics and principles to a variety of social systems. Use of methods and strategies that build capacity and resilience while leading to long term systemic change.
Prerequisite: Sustainable Food and Farming majors only
3 credits/spring sem
STOCKSCH 398

Practicum
Internship or other pre-professional work experience in the field of plant and soil sciences.
Prerequisites: course work in plant biology, soil science, and minimum two mid-level STOCKSCH courses; consent of faculty advisor
1-12 credits/both sem

STOCKSCH 398E

Farm Enterprise Practicum
Guided practicum experience providing students with practical experience in growing crops, as well as managing and marketing these crops in support of their educational goals. Students will develop, use and evaluate crop plans, including all aspects of production and marketing. Practical experience in management of soil fertility, water, and pests using IPM and organic methods.
Enrollment limited.
Prerequisites: STOCKSCH 105 and STOCKSCH 376; juniors; consent of instructor
3-6 credits/spring sem

STOCKSCH 398G

Greenhouse Practicum
Focus on greenhouse venting and temperature control, maintaining outdoor gardens, harvesting of floricultural crops, post-harvest handling of floricultural crops, fertilization, propagation (by seed, cuttings, division), greenhouse maintenance, operation of greenhouse equipment (fertilizer injector).
Prerequisite: consent of instructor
1-18 credits/both sem

STOCKSCH 398T

Turf Practicum
Internship or other pre-professional work experience in the field of turfgrass management, including but not limited to golf course management, athletic field maintenance, and professional lawn care.
Prerequisites: STOCKSCH 230; consent of instructor
1-12 credits/both sem

STOCKSCH 476

Student Farm Management II
Practical application of harvesting and marketing techniques used for the sale of organic vegetable crops. Students will complete a financial analysis of the current growing season and make recommendations for the next production cycle.
Prerequisites: STOCKSCH 376; should be taken concurrently with STOCKSCH 498E; consent of instructor
3 credits/fall sem

STOCKSCH 490S

Soil Ecology
Introduction to soils as their own ecosystem. Descriptions of the diversity of life found within soils, plant-soil interactions and biogeography will be weaved together to paint a mosaic of soil life, its complexity and global importance. Final portion of the course will address the global challenges facing soil ecosystems and the potential of the soil health movement. Course includes three field trips during regular scheduled lecture time.
Prerequisite: STOCKSCH 105 or ENVIRSCI 364
3 credits/fall sem

STOCKSCH 496

Independent Study
Research or other independent upper-level project in plant and soil sciences.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496A

Independent Study-Plant Science
Plant science research in laboratory or greenhouse.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496B

Independent Study-Soil Science
Soil science research in laboratory or field setting.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496C

Independent Study-Teaching Assistant
Assist with instruction/classroom preparation for Stockbridge School courses.
Prerequisites: consent of instructor reaching the course; Independent Study contract; FERPA certification if involved with grading
1-6 credits/both sem

STOCKSCH 496D

Independent Study-Insect Science
Upper-level project for students who have satisfactorily completed minimum one 500-level entomology-related class in addition to foundation course work in biology and/or entomology.
Prerequisite: consent of instructor
1-6 credits/both sem
STOCKSCH 398
Practicum
Internship or other pre-professional work experience in the field of plant and soil sciences.
Prerequisites: course work in plant biology, soil science, and minimum two mid-level STOCKSCH courses; consent of faculty advisor
1-12 credits/both sem

STOCKSCH 398E
Farm Enterprise Practicum
Guided practicum experience providing students with practical experience in growing crops, as well as managing and marketing these crops in support of their educational goals. Students will develop, use and evaluate crop plans, including all aspects of production and marketing. Practical experience in management of soil fertility, water, and pests using IPM and organic methods.
Enrollment limited.
Prerequisites: STOCKSCH 105 and STOCKSCH 376; juniors; consent of instructor
3-6 credits/spring sem

STOCKSCH 398G
Greenhouse Practicum
Focus on greenhouse venting and temperature control, maintaining outdoor gardens, harvesting of floricultural crops, post-harvest handling of floricultural crops, fertilization, propagation (by seed, cuttings, division), greenhouse maintenance, operation of greenhouse equipment (fertilizer injector).
Prerequisite: consent of instructor
1-18 credits/both sem

STOCKSCH 398T
Turf Practicum
Internship or other pre-professional work experience in the field of turfgrass management, including but not limited to golf course management, athletic field maintenance, and professional lawn care.
Prerequisites: STOCKSCH 230; consent of instructor
1-12 credits/both sem

STOCKSCH 476
Student Farm Management II
Practical application of harvesting and marketing techniques used for the sale of organic vegetable crops. Students will complete a financial analysis of the current growing season and make recommendations for the next production cycle.
Prerequisites: STOCKSCH 376; should be taken concurrently with STOCKSCH 498E; consent of instructor
3 credits/fall sem

STOCKSCH 490S
Soil Ecology
Introduction to soils as their own ecosystem. Descriptions of the diversity of life found within soils, plant-soil interactions and biogeography will be weaved together to paint a mosaic of soil life, its complexity and global importance. Final portion of the course will address the global challenges facing soil ecosystems and the potential of the soil health movement. Course includes three field trips during regular scheduled lecture time.
Prerequisite: STOCKSCH 105 or ENVIRSCI 364
3 credits/fall sem

STOCKSCH 496
Independent Study
Research or other independent upper-level project in plant and soil sciences.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496A
Independent Study-Plant Science
Plant science research in laboratory or greenhouse.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496B
Independent Study-Soil Science
Soil science research in laboratory or field setting.
Prerequisites: course work in plant biology, soil science, chemistry, and minimum one upper-level STOCKSCH course; consent of instructor
1-6 credits/both sem

STOCKSCH 496C
Independent Study-Teaching Assistant
Assist with instruction/classroom preparation for Stockbridge School courses.
Prerequisites: consent of instructor teaching the course; Independent Study contract; FERPA certification if involved with grading
1-6 credits/both sem

STOCKSCH 496D
Independent Study-Insect Science
Upper-level project for students who have satisfactorily completed minimum one 500-level entomology-related class in addition to foundation course work in biology and/or entomology.
Prerequisite: consent of instructor
1-6 credits/both sem
STOCKSCH 498
Practicum
Internship or other pre-professional work experience in the field of plant and soil sciences.
Prerequisite: consent of instructor
1-12 credits/both sem

STOCKSCH 498E
Farm Enterprise Practicum II
Continuation of STOCKSCH 398E. Students maintain crops planted in the spring semester and prepare fields for winter. Students will harvest, clean, store and market their crops.
Prerequisites: STOCKSCH 398E; should be taken concurrently with STOCKSCH 476; consent of instructor
1-6 credits/fall sem

STOCKSCH 505
General Plant Pathology
With lab. Causes, nature, and control of plant diseases. Diagnosis of plant diseases. Mechanisms, biochemistry, and genetics of plant disease induction, development, and control.
Prerequisite: STOCKSCH 384 or MICROBIO 310 or 100-level biology course or consent of instructor
4 credits/fall sem

STOCKSCH 510
Management and Ecology of Plant Diseases
The ecology of plant, microbe, and human interactions in plant diseases, from wilderness to industrial farms. Epidemics, traditional farming, environmental impacts and sustainability issues. Ways in which agriculture, particularly plant production and plant disease management, change ecosystems.
Prerequisite: BIOLOGY 151 or equivalent
3 credits/spring sem

STOCKSCH 515
Microbiology of the Soil
Microbial processes in the soil and sediment environment; ecology of the various microbial communities; decomposition of organic matter, carbon transformation, nitrogen, sulfur, phosphorus and other mineral transformations. Chemistry of these reactions and their biogeochemical implications. Biological equilibrium, the rhizosphere, and microbial associations.
Prerequisites: CHEM 250 or CHEM 261 and basic biology course
3 credits/fall sem

STOCKSCH 523
Plant Stress Physiology
Advanced course focusing on plant responses to major abiotic stresses. Current research topics in stress physiology will be discussed.
Prerequisite: STOCKSCH 384 or BIOLOGY 510
3 credits/fall sem

STOCKSCH 525
Myology
Biology, ecology, classification and identification of fungi and fungal-like organisms. Includes consideration of fungi as causes of diseases in animals, humans, and plants, and their uses in biotechnology applications.
Prerequisite: BIOLOGY 151
4 credits/fall sem/odd years

STOCKSCH 530
Plant Nutrition
With lab. The acquisition, translocation, distribution, and function of the essential inorganic elements in plants. Genetic control of plant nutrition and ecological adaptation to nutritional variables. Diagnosis of plant nutritional disorders.
Prerequisites: STOCKSCH 105 and STOCKSCH 108, and either CHEM 110 or CHEM 111 or equivalent courses
4 credits/fall sem

STOCKSCH 535
Diagnostic Plant Pathology
Methods of diagnosing plant diseases caused by fungi, bacteria, viruses, nematodes, and abiotic agents considered using specimens collected by students.
Prerequisite: STOCKSCH 505
4 credits/spring sem/odd years

STOCKSCH 545
Postharvest Biology
The basic biochemical and physiological processes occurring in fruits, vegetables, and flowers after harvest; postharvest treatments to modify these processes.
Prerequisites: STOCKSCH 384, and either CHEM 110 or CHEM 111
4 credit/spring sem

STOCKSCH 550
Plant Hormones and Applied Plant Physiology
The influence of naturally occurring plant hormones on regulating physiology, growth, and development in plants. Uses and potential uses of synthetic plant growth regulators, cultural techniques, and horticultural practices to improve the production of food, fiber and ornamental plants.
Prerequisites: STOCKSCH 108 or 100-level biology course; STOCKSCH 384 recommended
3 credits/spring sem

STOCKSCH 572
Nematology
With lab. Biology and identification of soil nematodes. Parasitism of plants and management practices stressed.
Prerequisite: STOCKSCH 505 or BIOLOGY 153
4 credits/fall sem/even years
STOCKSCH 498
Practicum
Internship or other pre-professional work experience in the field of plant and soil sciences.
Prerequisite: consent of instructor
1-12 credits/both sem

STOCKSCH 498E
Farm Enterprise Practicum II
Continuation of STOCKSCH 398E. Students maintain crops planted in the spring semester and prepare fields for winter. Students will harvest, clean, store and market their crops.
Prerequisites: STOCKSCH 398E; should be taken concurrently with STOCKSCH 476; consent of instructor
1-6 credits/fall sem

STOCKSCH 505
General Plant Pathology
With lab. Causes, nature, and control of plant diseases. Diagnosis of plant diseases. Mechanisms, biochemistry, and genetics of plant disease induction, development, and control.
Prerequisite: STOCKSCH 384 or MICROBIO 310 or 100-level biology course or consent of instructor
4 credits/fall sem

STOCKSCH 510
Management and Ecology of Plant Diseases
The ecology of plant, microbe, and human interactions in plant diseases, from wilderness to industrial farms. Epidemics, traditional farming, environmental impacts and sustainability issues. Ways in which agriculture, particularly plant production and plant disease management, change ecosystems.
Prerequisite: BIOLOGY 151 or equivalent
3 credits/spring sem

STOCKSCH 515
Microbiology of the Soil
Microbial processes in the soil and sediment environment; ecology of the various microbial communities; decomposition of organic matter, carbon transformation, nitrogen, sulfur, phosphorus and other mineral transformations. Chemistry of these reactions and their biogeochemical implications. Biological equilibrium, the rhizosphere, and microbial associations.
Prerequisites: CHEM 250 or CHEM 261 and basic biology course
3 credits/fall sem

STOCKSCH 523
Plant Stress Physiology
Advanced course focusing on plant responses to major abiotic stresses. Current research topics in stress physiology will be discussed.
Prerequisite: STOCKSCH 384 or BIOLOGY 510
3 credits/fall sem

STOCKSCH 525
Mycology
Biology, ecology, classification and identification of fungi and fungal-like organisms. Includes consideration of fungi as causes of diseases in animals, humans, and plants, and their uses in biotechnology applications.
Prerequisite: BIOLOGY 151
4 credits/fall sem/odd years

STOCKSCH 530
Plant Nutrition
With lab. The acquisition, translocation, distribution, and function of the essential inorganic elements in plants. Genetic control of plant nutrition and ecological adaptation to nutritional variables. Diagnosis of plant nutritional disorders.
Prerequisites: STOCKSCH 105 and STOCKSCH 108, and either CHEM 110 or CHEM 111 or equivalent courses
4 credits/fall sem

STOCKSCH 535
Diagnostic Plant Pathology
Methods of diagnosing plant diseases caused by fungi, bacteria, viruses, nematodes, and abiotic agents considered using specimens collected by students.
Prerequisite: STOCKSCH 505
4 credits/spring sem/odd years

STOCKSCH 545
Postharvest Biology
The basic biochemical and physiological processes occurring in fruits, vegetables, and flowers after harvest; postharvest treatments to modify these processes.
Prerequisites: STOCKSCH 384, and either CHEM 110 or CHEM 111
4 credit/spring sem

STOCKSCH 550
Plant Hormones and Applied Plant Physiology
The influence of naturally occurring plant hormones on regulating physiology, growth, and development in plants. Uses and potential uses of synthetic plant growth regulators, cultural techniques, and horticultural practices to improve the production of food, fiber and ornamental plants.
Prerequisites: STOCKSCH 108 or 100-level biology course; STOCKSCH 384 recommended
3 credits/spring sem

STOCKSCH 572
Nematology
With lab. Biology and identification of soil nematodes. Parasitism of plants and management practices stressed.
Prerequisite: STOCKSCH 505 or BIOLOGY 153
4 credits/fall sem/even years
STOCKSCH 575
Environmental Soil Chemistry
With lab. Fundamental chemical concepts/processes in soils, such as ion exchange, precipitation/dissolution, redox reactions, partitioning and adsorption, and solution speciation and nature of soil minerals and organic matter. Examination of how chemical processes affect fate, transport, availability, and remediation of trace elements, heavy metals and organic contaminants in soils and sediments. Discussion on current environmental issues and problems.
Prerequisites: CHEM 110 or CHEM 111 or consent of instructor; STOCKSCH 105 strongly recommended
4 credits/fall sem

STOCKSCH 580
Soil Fertility
The role of mineral elements in the growth of plants; plant response to fertilizers and other soil amendments; soil reaction, mineral deficiencies and toxicities; environmental impact of soil fertility management practices.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 (or equivalents), and either CHEM 110 or CHEM 111
3 credits/spring sem

STOCKSCH 585
Inorganic Contaminants in Soil, Water, and Sediment
Physical, chemical, and biological factors affecting the fate and transport of inorganic contaminants (including heavy metals) in soil, water and sediment. Sources, chemistry, pedogenic and geochemical behavior of these contaminants and methods used for their analysis. Risk assessment, and remediation technologies, options, and goals.
Prerequisites: CHEM 111 and CHEM 112, knowledge of college algebra, basic soil science, and transition metal chemistry, or consent of instructor
3 credits/spring sem

STOCKSCH 587
Phyto/Bioremediation
Various aspects of phytoremediation - the use of plants (both natural hyper-accumulators and transgenic) and their associated microbes with the purpose of environmental clean-up of contaminated soil, sediments and water. Various strategies for phytoremediation of a wide range of toxic pollutants, both organic and elemental, with special emphasis on toxic metals will be discussed.
Prerequisite: STOCKSCH 384, BIOLOGY 151, or BIOLOGY 152
3 credits/fall sem

STOCKSCH 590M
Microbe-Mineral-Organic Matter Interactions in Soils
Fundamental interactions between microbes, minerals, and organic matter responsible for carbon cycling, mineral weathering, and nutrient dynamics in soils. Examination of the importance of these interactions for soil development, carbon storage, and fertility. Discussion of the underlying mechanisms and suitable analytical methods for their investigation. How these mechanisms respond to global environmental change will be examined, and how this response in turn impacts soil functioning.
Prerequisites: STOCKSCH 105 and either CHEM 110 or CHEM 111; STOCKSCH 575, CHEM 261, and MICROBIO 310 recommended
3 credits/spring sem

STOCKSCH 591A
Plant Biotech Journal Club
Open to both graduate students and advanced undergraduate students who have an interest in reviewing the current scientific literature in the field of plant biotechnology.
1 credit/both sem

STOCKSCH 597M
Topics in Turf Pathology
Review and discussion of concepts and issues related with turfgrass diseases. Reading of scientific papers and trade journals required each week. Guest speakers from turfgrass industry present many of the topics and lead subsequent class discussion.
Prerequisite: STOCKSCH 505
2-3 credits/spring sem
STOCKSCH 575
Environmental Soil Chemistry
With lab. Fundamental chemical concepts/processes in soils, such as ion exchange, precipitation/dissolution, redox reactions, partitioning and adsorption, and solution speciation and nature of soil minerals and organic matter. Examination of how chemical processes affect fate, transport, availability, and remediation of trace elements, heavy metals and organic contaminants in soils and sediments. Discussion on current environmental issues and problems.
Prerequisites: CHEM 110 or CHEM 111 or consent of instructor; STOCKSCH 105 strongly recommended
4 credits/fall sem

STOCKSCH 580
Soil Fertility
The role of mineral elements in the growth of plants; plant response to fertilizers and other soil amendments; soil reaction, mineral deficiencies and toxicities; environmental impact of soil fertility management practices.
Prerequisites: STOCKSCH 105 and STOCKSCH 108 (or equivalents), and either CHEM 110 or CHEM 111
3 credits/spring sem

STOCKSCH 585
Inorganic Contaminants in Soil, Water, and Sediment
Physical, chemical, and biological factors affecting the fate and transport of inorganic contaminants (including heavy metals) in soil, water and sediment. Sources, chemistry, pedogenic and geochemical behavior of these contaminants and methods used for their analysis. Risk assessment, and remediation technologies, options, and goals.
Prerequisites: CHEM 111 and CHEM 112, knowledge of college algebra, basic soil science, and transition metal chemistry, or consent of instructor
3 credits/spring sem

STOCKSCH 587
Phyto/Bioremediation
Various aspects of phytoremediation - the use of plants (both natural hyper-accumulators and transgenic) and their associated microbes with the purpose of environmental clean-up of contaminated soil, sediments and water. Various strategies for phytoremediation of a wide range of toxic pollutants, both organic and elemental, with special emphasis on toxic metals will be discussed.
Prerequisite: STOCKSCH 384, BIOLOGY 151, or BIOLOGY 152
3 credits/fall sem

STOCKSCH 590M
Microbe-Mineral-Organic Matter Interactions in Soils
Fundamental interactions between microbes, minerals, and organic matter responsible for carbon cycling, mineral weathering, and nutrient dynamics in soils. Examination of the importance of these interactions for soil development, carbon storage, and fertility. Discussion of the underlying mechanisms and suitable analytical methods for their investigation. How these mechanisms respond to global environmental change will be examined, and how this response in turn impacts soil functioning.
Prerequisites: STOCKSCH 105 and either CHEM 110 or CHEM 111; STOCKSCH 575; CHEM 261, and MICROBIO 310 recommended
3 credits/spring sem

STOCKSCH 591A
Plant Biotech Journal Club
Open to both graduate students and advanced undergraduate students who have an interest in reviewing the current scientific literature in the field of plant biotechnology.
1 credit/both sem

STOCKSCH 597M
Topics in Turf Pathology
Review and discussion of concepts and issues related with turfgrass diseases. Reading of scientific papers and trade journals required each week. Guest speakers from turfgrass industry present many of the topics and lead subsequent class discussion.
Prerequisite: STOCKSCH 505
2-3 credits/spring sem
ACADEMIC CALENDAR 2020 - 2021

FALL 2020

August 24 Monday First day of classes
September 7 Monday Holiday (Labor Day) CLASSES WILL BE HELD
September 14 Monday Last day to ADD or Drop any class with no record
October 12 Monday Holiday (Columbus Day) CLASSES WILL BE HELD
October 16 Monday Last day to Drop with ‘W’ and select ‘P/F’
October 26 Monday Registration begins for Spring 2021
November 11 Wednesday Holiday (Veteran’s Day) CLASSES WILL BE HELD
November 20 Friday Last day of classes
November 20 Friday Thanksgiving recess begins following end of classes
November 27 Friday Reading Day
November 28 Saturday Reading Day
November 30 Monday Final exams begin; exams to be administered remotely
December 2 Friday Last day of final examinations; semester ends

Number of class meetings: MTuWThF: 13

SPRING 2021

February 1 Monday First day of classes
February 12 Friday Last day to ADD or Drop any class with no record
February 15 Monday Holiday (Presidents’ Day) CLASSES WILL BE HELD
February 24 Wednesday Wellbeing Wednesday Observed NO CLASSES
March 1 Monday WEDNESDAY CLASS SCHEDULE will be followed
March 29 Monday Last day to Drop with ‘W’ and select ‘P/F’
April 5 Monday Registration begins for Fall 2021
April 14 Wednesday Wellbeing Wednesday Observed NO CLASSES
April 19 Monday Holiday (Patriot’s Day) CLASSES WILL BE HELD
April 20 Tuesday WEDNESDAY CLASS SCHEDULE will be followed
May 4 Tuesday Last day of classes
May 5 Wednesday Reading Day
May 6 Thursday Final examinations begin
May 8 Saturday Reading Day
May 12 Wednesday Last day of final examinations; semester ends
May 14 Friday Undergraduate Commencement (Virtual or In Person)
May 17 Monday Final grades due by Midnight

Number of class meetings: MTuWThF: 13
